

Topology

Course Information

Lecturer: I. Goldsheid (email: I.Goldsheid@qmul.ac.uk)

Lectures: Thursday 11-12, 12-13, Maths 203

Tutorials: Tuesday 12-13, Maths 203

Office Hours: see the main web page

Assessment: 100% final examination

Coursework: I intend to produce between 6 and 10 exercise sheets. Exercise sheets will contain a mixture of routine examples and more challenging problems. It is essential for your understanding of the course that you make a serious attempt to do the coursework.

Examination: The following rubric will be used:

You should attempt all questions. Marks awarded are shown next to the questions.

Calculators are NOT permitted in this examination. The unauthorised use of a calculator constitutes an examination offence.

Books: All the material you need to know will be covered in lectures. The following text books are recommended:

B. Mendelson, Introduction to topology (Dover Publications)

W. A. Sutherland, Introduction to metric and topological spaces (CUP)

All handouts and exercise sheets will be put on the webpage.
